Berlin, Germany | +49-17630538202 | mahiraamu@gmail.com | linkedin.com/in/mahira-ahmad-869953133 | github.com/mahira13

PROFESSIONAL SUMMARY

Flutter developer with 4+ years shipping production iOS and Android apps end to end, most of it as the sole or founding mobile engineer at early-stage startups. Owning architecture, state management (BLoC, Riverpod, GetX), and the App Store/Play Store release process. Solid, hands-on experience integrating cloud backends (Firebase, Supabase, AWS), REST/GraphQL APIs, and real-time features. A master's background in computer vision and deep learning drives a genuine focus on Flutter-AI intersection work: on-device inference, LLM and agentic app integration, gen AI features and workflow automation. Also comfortable writing basic Python/FastAPI services to support those AI features, though backend work stays secondary to Flutter. Based in Berlin, building German fluency (B1) alongside the day-to-day work.

PROFESSIONAL EXPERIENCE

EKUTIR, Remote | Dec 2025 – June 2026

Flutter Developer

- Led architecture improvements across multiple Flutter applications used by farmers, improving maintainability through feature-based SOLID architecture.
- Developed real-time land polygon mapping features, enabling farmers to visualise and manage agricultural boundaries using interactive maps and geospatial data.
- Optimised app performance and collaborated closely with product and backend teams to deliver scalable mobile solutions

UPLIFT HER (Concurrent), Germany, Remote | Dec 2025 – Present

Founding Engineer (Part time)

- Building women focused social networking platform app using Flutter and Supabase.
- Implementing secure authentication, real time chat, location aware and interest-based matching.
- Contributing to GDPR conscious architecture, including privacy-first user data handling and consent-aware feature design.

BAEL HEALTH (Tecra Technology Solutions), Remote | June 2024 – Oct 2025

Flutter Developer

- Led end-to-end development of a medicine reminder and management app [Bael Health Reminder](#), utilized clean architecture principles and BLoC pattern ensuring scalability and maintainability.
- Responsible for launching the app on both Appstore and Playstore.
- Achieved higher user engagement by implementing advanced background notification scheduling using WorkManager.

NEETABLE, Bengaluru, IN | May 2022 – Dec 2023

Flutter Developer

- Successfully developed a social media app from scratch [The Bench - Dating Manager](#) with GetX state management, Amazon Cognito for authentication, DynamoDB as database, S3 for storage and Amplify GraphQL queries.
- Implemented social media features like like/share/comment on posts, real-time chat with GraphQL subscriptions, push notifications, and dynamic links for user invitations.
- Handled video compression and image optimization to ensure scalability and smooth UX.
- Supported on the early development stage of a prescription delivery app [Phox Tracker](#).
- Revamped codebase, migrated the above app in Flutter 3.0, used local storage for offline order delivery functionality.
- Spearheaded migration from setState to GetX state management, resulting in 30% less boilerplate code and a 25% improvement in developer productivity.
- Integrated Firebase Analytics and Crashlytics to establish data-driven development practices, identifying and resolving the top crash sources.
- Collaborated effectively with the UI/UX designers, backend team, testing team and the project managers for timely delivery of the apps. Deployed apps to both Appstore and Playstore.
- Participated in code reviews and agile sprints, contributing to the overall team productivity.

CANNY ALLEY TECH, Gurgaon, IN | Sep 2020 - May 2022

Software Developer

- Worked on migrating an existing teleconsultation app **CallDoc** in flutter using firebase and Rest APIs.
- Developed one to one video calling feature using Agora.io and firebase cloud functions.
- Integrated Google maps, youtube APIs, push notifications, graphs and dynamic links in flutter.
- Took ownership of full-stack tasks by creating APIs using Firebase Cloud Functions for the above app.
- Utilized Jira software religiously for issue tracking and project management.
- Supervised the team of 5 members for effective and timely delivery of the sprints.

SKILLS

- **Languages and Frameworks:** Dart, Flutter, Amplify GraphQL, REST APIs, Firebase, Supabase
- **Tools and Workflow:** Git, VS Code, Xcode, Android Studio, Jira, Agile, Postman, Copilot, Claude, n8n
- **State Management:** GetX, BLoC, Cubit, Riverpod
- **Cloud and DevOps:** AWS, GCP, CI/CD (github actions)
- **Other:** Figma, Firebase (Auth, Firestore, Storage, Functions, Analytics), Amazon DynamoDB, Cognito, S3, AppSync, Amplify, Python (basic), LLM Integrations, Google Maps, SOLID
Testing: Unit Testing, Widget Testing, Integration Testing, Mocktail

PERSONAL PROJECTS

AI Weekly Mental Health Insights Generator

- Built an on-device AI Flutter app running flutter_gemma (Qwen3, LiteRT/int4 quantized) to transform daily journal entries into personalised weekly mental health insights and a shareable PDF, with all inference running locally for privacy.
- Designed prompt workflows and structured JSON parsing to produce actionable, empathetic clinical-style insights rather than generic summaries.
- Explored practical applications of Generative AI within privacy-conscious mobile experiences.

EDUCATION

Aligarh Muslim University, 2020

Master of Technology, Computer Science & Engineering

Specialization: Computer Vision & Deep Learning

Aligarh Muslim University, 2018

Bachelor of Technology, Computer Engineering

CERTIFICATIONS & TRAININGS

- Microsoft Technology Associate: Intro to Programming (Python)
- Mobile App Development - NIIT, July 2016
- Machine Learning with Python - IIT Kanpur, July 2019

LANGUAGES

English (Fluent), Hindi (Native), Urdu (Fluent), German (currently learning B1)
